## 1 APP MARKET LOGIN

F-Secure's Protection Service for Business (PSB) protects your company's mobile devices, computers and servers from cyber criminals. Download the service onto your devices and you can surf the Internet even safer than before.

Because PSB has been made for the needs of businesses, it can be managed both on individual devices and as a whole using a web portal. For this, you will need a Telia App Market account. The App Market is a web portal for the management of cloud computing services and we will now briefly tell you how to get started using the service.

- A. If this is your first application subscription you should have received two email messages. One is the account activation message and the other is a confirmation of your F-Secure PSB order. Both messages have been sent from [noreply@datainfo.fi](mailto:noreply@datainfo.fi).
- B. On your first login, you must activate your App Market account by clicking the link in your activation message email and entering the information required for registration.

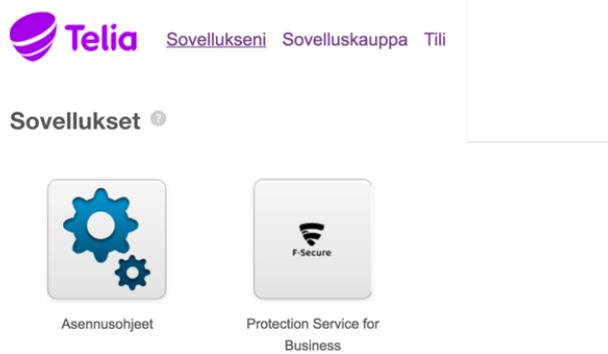

- C. If you already have an App Market account, you can directly log into the App Market using your email address and password at [sovelluskauppa.telia.fi](https://sovelluskauppa.telia.fi). Select "Log in" on the top right-hand corner of the page.

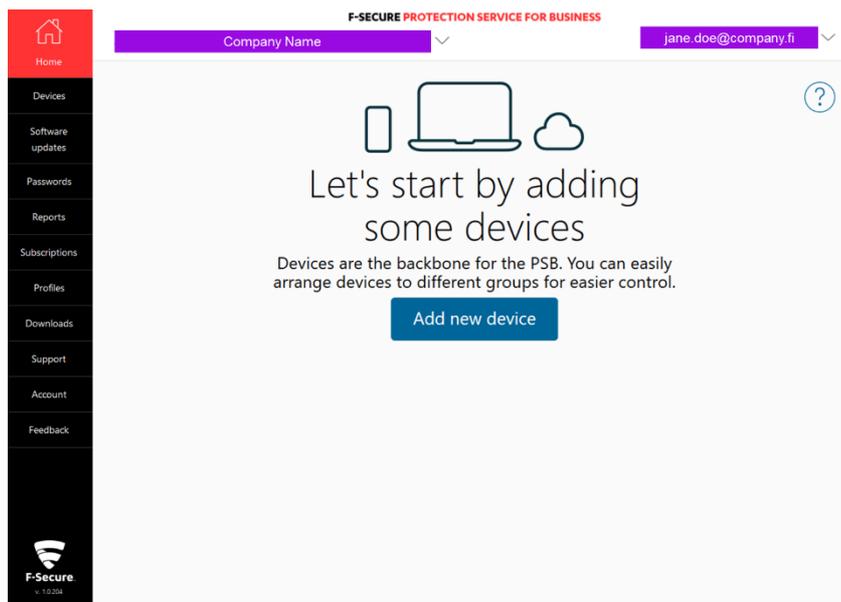

## 2 DEVICE PROTECTION

- A. When you have logged into the App Market, click the F-Secure logo on the My apps page. Clicking the logo will take you to the F-Secure management portal with no separate login required.

- B. Click on Add new device in the window that opened.

- C. Select whether you want to protect a computer or a mobile device. Computer Protection is a protection license for computers and Freedom for Business is a protection license for mobile devices.

The screenshot shows a dialog box titled "Add new device" with a progress bar at the top. The progress bar has three steps: "Select product" (active), "Send installation link", and "Done". Below the progress bar, there is a "Company Name" field. The main content area is titled "Select product" and contains two options: "Computer Protection" and "Freedom for Business". Each option has a radio button and a license status indicator: "license left (lisenssikoodisi, continuous license)". At the bottom, there are "Cancel" and "Next" buttons.

- D. Enter the details of the device's user and click send.

The screenshot shows the "Add new device" dialog box at the "Done" step. The progress bar at the top shows "Done" as the active step. Below the progress bar, there is a "Company Name" field. The main content area is titled "Done" and contains a green checkmark icon. Below the checkmark, there is a message: "Mobile device successfully added and assigned device key:" followed by a redacted device key. Below that, there is a message: "Download link and activation message were sent to:" followed by the email address "jane.doe@company.fi". Below that, there is a message: "Download link:" followed by the URL "https://psbdm1.sp.f-secure.com/" and a redacted link. At the bottom, there is a "Close" button.

- E. An invitation has now been sent to the user and they will receive an email invitation, which can be used to install the protection on the device.

**Tip:** If you want to protect several devices at one go, you can send them all a protection invite simultaneously from the Devices section at the left-hand corner of the portal.

### 3 APN CERTIFICATE FOR IPHONE AND IPAD DEVICES

- A. If you want to protect an iPhone or an iPad you will need a certificate required by Apple.  
If your company does not have an Apple iOS device and it does not intend to get them in the future, you can skip this part entirely and move to section 4.
- B. In the PSB portal, click Account on the left, APN certificates below it and connect to the Apple service. Follow the instructions on the screen.

F-SECURE PROTECTION SERVICE FOR BUSINESS

Company Name

jane.doe@company.fi

Account management

Administrators

APNs certificates

Connecting to Apple Services

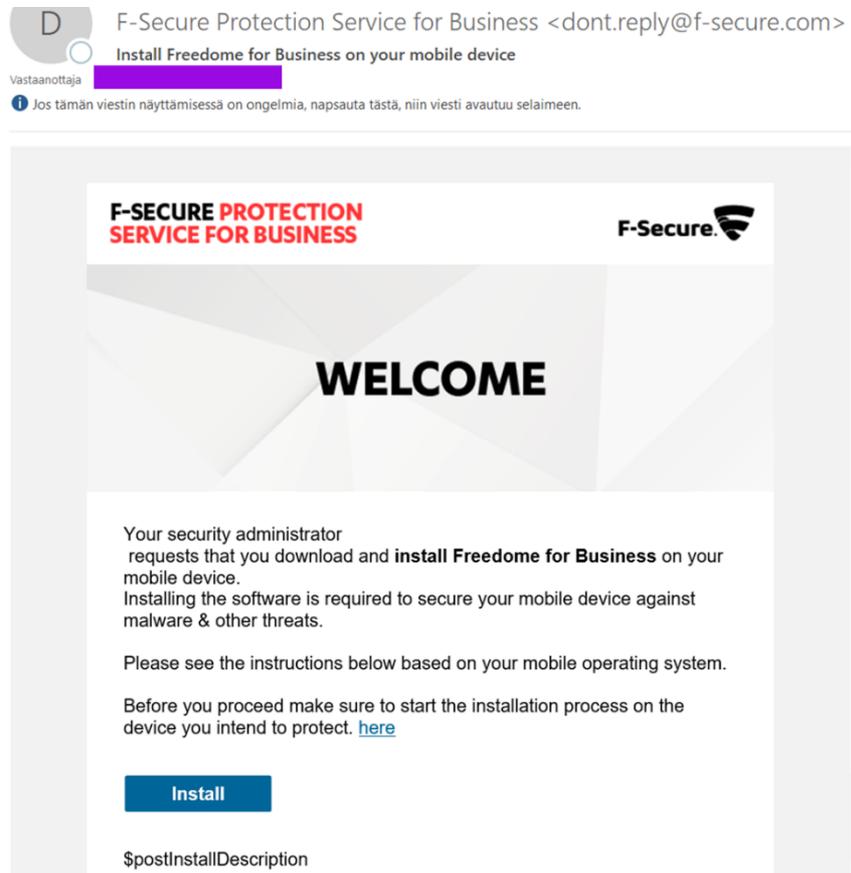

To install Freedom for Business on iOS devices, the F-Secure Protection Service for Business needs access to Apple services. An Apple Push Notification Service certificate (APNs) enables F-Secure Protection Service for Business to connect to devices in order to perform installation and administrative operations.

Connect with Apple

## 4 MOBILE SECURITY INSTALLATION

A. Check your email and search for the email sent by F-Secure shown below.

B. Open the installation instruction by clicking the blue “here” link. You can then protect your devices by clicking the install button at bottom left.

You can also find the installation instructions here:

- iOS devices [http://mobile.f-secure.com/psb/freedom/ios/install\\_fin.html](http://mobile.f-secure.com/psb/freedom/ios/install_fin.html)
- Android devices [http://mobile.f-secure.com/psb/freedom/android/install\\_fin.html](http://mobile.f-secure.com/psb/freedom/android/install_fin.html)

## 5 COMPUTER SECURITY INSTALLATION

- A. Check your email and search for an invitation email sent by F-Secure. Protect your computer by following the installation instructions in the email.

**F-SECURE PROTECTION SERVICE FOR BUSINESS** **F-Secure.**

# WELCOME

To protect your computer against harmful files and other threats, you need to download and install Protection Service for Business Computer Protection on it.

**To install the product:**

1. Download the installer:  
[Windows](#) [Mac](#)
2. Run the downloaded file to start the installation.
3. Enter your subscription key:
4. Select Automatic installation when prompted.
5. Restart your computer if needed.

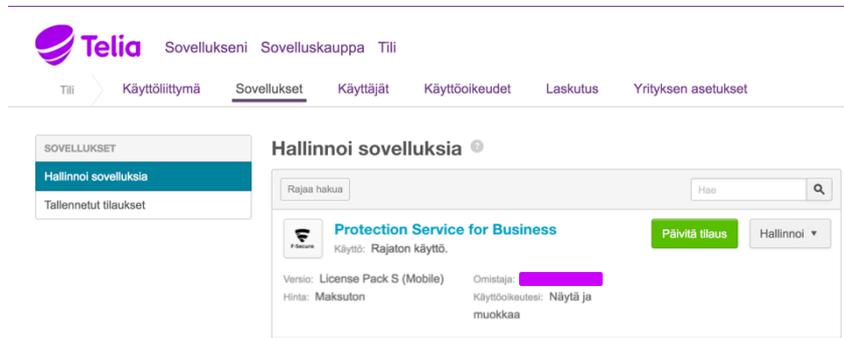

- B. Data security installation instructions can also be found here:
- a. For Windows <https://help.f-secure.com/product.html#business/computer-protection-windows/latest/fi>
  - b. For Mac <https://help.f-secure.com/product.html#business/psb-cp-mac/latest/fi>

## 6 UPDATING YOUR SUBSCRIPTION

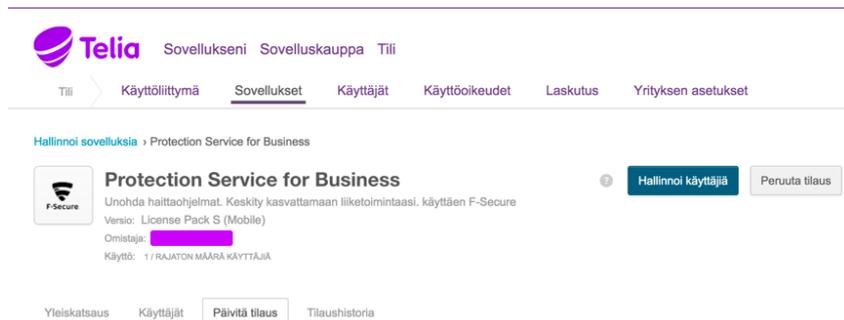

You can increase or reduce the number of protected devices by updating your subscription in the Telia App Market.

- A. Log in to the App Market and click on the Account tab. Select Applications.

The screenshot shows the Telia App Market interface. At the top, there's a navigation bar with 'Tili' (Account) selected. Below it, a sidebar lists 'SOVELLUKSET' (Applications) with 'Hallinnoi sovelluksia' (Manage applications) selected. The main content area shows 'Hallinnoi sovelluksia' with a search bar and a list of applications. The 'Protection Service for Business' application is highlighted, showing details like 'Versio: License Pack S (Mobile)', 'Hinta: Maksuton', and 'Käyttö: Rajaton käyttö'. A green 'Päivitä tilaus' (Update subscription) button is visible.

- B. Click on the green Update Subscription button and you can update the number of licences in the Update Subscription tab.

The screenshot shows the 'Päivitä tilaus' (Update subscription) page for 'Protection Service for Business'. The page displays the application icon, name, and description. Below this, there are fields for 'Versio: License Pack S (Mobile)', 'Omistaja: [redacted]', and 'Käyttö: 1 / RAJATON MÄÄRÄ KÄYTTÄJIÄ'. There are buttons for 'Hallinnoi käyttäjiä' (Manage users) and 'Peruuta tilaus' (Cancel subscription). At the bottom, there are tabs for 'Yleiskatsaus' (Overview), 'Käyttäjät' (Users), 'Päivitä tilaus' (Update subscription), and 'Tilaushistoria' (Subscription history).

- C. Always update the number of additional licences to their total amount! If you already have two additional licences and want to add one more, write 3 in the additional licences field.

The screenshot shows the 'Päivitä tilaus' (Update subscription) page for 'Advanced Security'. The page displays the subscription details, including the price and the number of licenses. Below this, there are input fields for updating the number of licenses.

|                    | tietokone-lisenssiä /<br>kk | mobiililaitte-lisenssiä<br>/ kk | Käyttäjät / kk   |
|--------------------|-----------------------------|---------------------------------|--|
| Advanced Security. | 1                           | 1                               | Rajaton  |
|                    |                             |                                 | 4,90 € / Kk  |
|                    |                             |                                 | +  |
|                    |                             |                                 | 3,90 € / tietokone-lisenssi / Kuukausi                                     |
|                    |                             |                                 | +  |
|                    |                             |                                 | 3,90 € / mobiililaitte-lisenssi / Kuukausi                                 |
|                    |                             |                                 | +  |
|                    |                             |                                 | 6,35 € / Palvelin / Kuukausi   |
|                    |                             |                                 | Ylimääräisten tietokone-lisenssiä määrä <input type="text" value="0"/>     |
|                    |                             |                                 | Ylimääräisten mobiililaitte-lisenssiä määrä <input type="text" value="0"/> |
|                    |                             |                                 | Käyttäjämäärä <input type="text" value="0"/>                               |

- D. You can also use the Account tab to add new administrators in the Users tab and check the invoice history of your company in the Billing tab.
